

Futsal Focus: Combine creatively 4

Team 1

Team 2

Ball

Organisation: The game is set 3v3 and two support players on opposite sides. The game is played in one half of a Futsal court so another identical game can be going on in the other half. GK's can be included as outfield players to work on their footwork skills.

How to play: This is a very simple and popular game but it contains some great opportunities to rotate and move intelligently for the team in possession so should not be overlooked.

Playing 3v3 each team tries to keep possession and to help, each team can use their support player on the outside. If the ball is passed out a player must take up this place as the receiving player goes into the middle.

This is where it is particularly helpful for Futsal (and football) because it is the most appropriate player who rotates out and balances the team off rather than the player who passed it out.

Help players to recognise when they are the best player to drop out.
